

David Bolivar

Rocky Mount, North Carolina • 252.314.9439 • davidbolivar56@gmail.com • linkedin.com/in/bolivar13

Systems analyst and applications developer specializing in the reporting, internal applications, and integrations that give organizations visibility into their own data – 20+ BI reports and applications currently in production, built end to end from requirements through deployment in an enterprise ERP environment.

WORK EXPERIENCE

City of Rocky Mount

Rocky Mount, North Carolina

Business Systems Analyst

Nov 2022 – Present

Covering the Applications Analyst role since Nov 2025: ERP administration for the City's Tyler MUNIS environment.

- Administer the enterprise ERP: user provisioning and access configuration, troubleshooting with and without vendor support, and supporting system upgrades and the financial year-end close.
- Stood up a Proxmox dev/test environment so applications are validated before production; co-built a self-hosted LLM server (Ollama) now powering AI features in internal apps.
- Built 20+ production BI reports and applications (Power BI, SSRS, Django/Flask) serving Finance, Business & Collections, HR, and management – departments that previously had no consolidated view of their own data now use these tools for day-to-day, data-informed decisions.
- Developed custom web applications that replace manual, spreadsheet-driven workflows, integrated with the City's existing systems: the ERP database (SQL Server), Zendesk, Active Directory, and Power Automate.
- Built an ERP access-governance application (Django/HTMX) handling role-based provisioning and multi-level access-request approvals, replacing an email-based process with an auditable workflow.
- Rebuilt general-ledger reporting to include unposted journal entries, reconciling Power BI output against the ERP's own inquiry screens and correcting an encumbrance overstatement caused by unfiltered transaction types.

Interim IT Project Manager

Oct 2024 – Jun 2025

Led a team of 5 application analysts supporting the City's enterprise applications, while overseeing an active portfolio of ~50 IT projects.

- Implemented the City's first structured project-management framework – intake, approval, SLAs, and task assignment on Monday.com – giving departments visibility into project status that previously lived in email threads.

North Carolina Wesleyan University

Rocky Mount, North Carolina

Graduate Assistant – Adult & Professional Studies

Part-time

- Built a student-outreach automation system: a Selenium/Flask tool that logs communications into the student information system (Jenzabar J1), plus a dashboard staff use to prioritize outreach.

Kaba Ilco Corp (dormakaba)

Rocky Mount, North Carolina

Inventory Control Analyst

Feb 2022 – Nov 2022

- Built an inventory reporting system in Excel (macros/VBA) that surfaced discrepancies for buyers and planners, and analyzed inventory trends to inform allocation decisions.

SELECTED PROJECTS

Enterprise Timekeeping System Upgrade & Integration

Dec 2024 – Apr 2025

Led the upgrade and reconfiguration of the City's timekeeping system covering 1,200+ employees – requirements across Accounting, Payroll, and HR, data integration, and rollout documentation.

Public-Safety Systems Integration (API)

Nov 2024 – Feb 2025

Led REST API integrations connecting the City's CAD and records-management systems with third-party vendors – police body-worn cameras, citizen-feedback surveys, and predictive patrol deployment.

EDUCATION

MBA – North Carolina Wesleyan University

Expected Jul 2027

M.S., Information Technology Management – North Carolina Wesleyan University

May 2026

• GPA: 3.8 • President's Honors List

B.S., Computer Information Systems – North Carolina Wesleyan University

Dec 2021

• GPA: 3.94 • President's Honors List & Scholarship
